1/78 Leonard Street, Victoria Park, WA 6100

Professional Summary

Results-driven product consultant with 4+ years experience, specialised in delivering high-value digital products to clients through product management and software engineering expertise. Adept at bridging the gap between technical complexities and strategic objectives to successfully lead cross-functional teams to product success.

Employment History

Product Lead – v(dev), a Visagio Company

Perth, Australia · Jul 2023 – Present

- Led the *productification* workstream, converting successful product-related consulting success stories to fit-for-purpose digital products.
- Developed key new services offerings under Product Management to enhance existing software development offering and develop the firm's product management capabilities.

Senior Product Consultant – Visagio

Perth, Australia / Singapore · May 2020 – Present

- Led cross-functional teams to deliver 10+ high-impact digital products to clients across natural resources, oil & gas, and insurance sectors in APAC, specialising in SaaS solutions, low-code applications, and process automations.
- Managed the development and implementation as a Technical Product Manager of a supply chain planning web application for a global mining leader, delivering an estimated $17.5M AUD EBITDA uplift by optimising production and maintenance plans.
- Pioneered an engagement with a key client in Singapore, representing the Australia office in its first project in the region. Successfully built a strong relationship with senior management, establishing a partnership that has spanned 2+ years and involved 30+ consultants.

Co-President – Melbourne University Tennis Club

Melbourne, Australia · Jan 2020 – Dec 2020

- Steered the 300+ members club through the challenges of the COVID-19 pandemic, achieving a 100%+ social media growth through targeted digital campaigns and secured financial stability through strategic planning and resource allocation, positioning it for future success.
